METTA - is your bodyguard

Too often our office chairs cannot maintain proper sitting position:

- intervertebral discs overload and compression inducing their subsequent protrusion and destruction
- spinal nerves pinching and inflammation which carry motor, sensory, and autonomic signals between the spinal cord and the body
- back muscles, organs of thoracic cavity and coxofemoral circulatory disturbances
- leg lymph and blood circulation stasis
- points of chair contact overheating

METTA chair series do not only guarantee complete back relaxation, but also prevent diseases development, caused by sedentary work type

- Ergonomic shape of METTA backrest and the seat corresponds to the anatomic human body shape. The loads are steady induced to the surface area of the headrest and the seat decrease muscles fatigue and facilitating blood circulation
- Breathable, heat - dispersive upholstery materials keep the body temperature balance
- Due to the separate seat and backrest tilting, synchro mechanism enables to unbend the body from time to time that improves blood circulation and loosens back
- All types of personal settings ensure:
 - 2D steel-frame chrome covered lumbar support: adjustable for height, adjustable for depth;
 - seat depth and tilt adjustment;
 - 3D headrest - height, depth and tilting angle adjustment;
 - 4D armrest - height, armrest pad width, armrest pad depth, armrest pad shifting angle adjustment;
 - 5D armrest - height, back and front. The clearance between the armrests during installation, the rotation of the armpad by 360°. 2 points of rotation rotation: 60° inside, 30° outside. The armrests pads have very soft velvety surface of the upper part (Having

Scientific studies revealed METTA chair to reduce significantly the muscle tension and even distribution of the load over the body surface.

Muscle tension

Compared with conventional chairs stress to the back, hips and legs is sufficiently reduced while sitting on METTA

Load distribution

The METTA backrest and seat corresponds to the anatomic human body shape

METTA is a real health protector!

METTA CHAIRS WITH UNIQUE ERGONOMIC FEATURES, GUARANTEE HIGH STAFF CAPACITY

It is well known:

Comfortable ergonomic work space increases staff capacity by 40%

[Bundesantalt für Arbeitsschutz und Arbeitsmedizin, bAuA]

- ✓ overall sense of well-being improvement
- ✓ elevation of attentiveness
- ✓ high level of concentration
- ✓ the number of errors decrease

The cost of METTA chairs is reimbursed in two months, and then, provide a tangible income

1) Due to increase of productivity

According to Schwarz & Neumann forschung Unternehmen GmbH only due to increased employee productivity, the METTA chair pays off within 2 month:

$$2\,100 \times 0,15 \times 11 = 3\,465 \text{ €}$$

(personnel productivity for 1 month)

(15%-minimal productivity enhancement using SAMURAI)

(month)

Net profit per an employee by METTA chair operating

3 715 €

Chair cost will be reimbursed in 2 months:

$$350 / (2\,100 \times 0,15) = 0,8$$

(cost of chair)

(personnel productivity for 1 month)

(15%-minimal productivity enhancement using METTA)

350 €
The average cost of chair

The average cost of METTA chair is only 350 €

2) Reduce the number of sick leave days

Non-ergonomic workplace causes 30% office employees diseases [Gesundes sitzen. StolComfort]

One day absence of a qualified professional at work costs the company on average 100€, even 5 days your staff "Sick leave" reduction, brings your company 500 € income per year

3 715 €* of pure income
after 1 year of usage

$$*3\,465 + 500 - 350 = 3\,615$$

Individuality of METTA ergonomic chairs

Four chair sizes L, B, M, S were specifically designed for any body type. Any user is worth a chair that would serve him in the best way possible from the backrest height and seat width to castor type.

Sizes L

510 mm

Sizes B

475 mm

Sizes M

Sizes S

METTA Y

NEW GENERATION OF DYNAMIC CHAIRS SERIES METTA Y

Experience the new
standard of proper seating!

METTA Y innovative chairs are a combination
of high-quality ergonomic chairs and the patented
3D dynamic sitting technology.

When you sit in a METTA Y chair your every move will
be converted by the chair mechanism to keep your
body in the perfect balance and comfort.

METTA Y 2D Move

- Independent backrest and seat tilt
- Adaptive movable backrest, additional recline

METTA Y 3D Elastic

- Independent backrest and seat tilt
- Freedom of movement, side bends
- Dynamic side bends support

METTA Y 4D Free

- Independent backrest and seat tilt
- Freedom of movement, side bends
- Dynamic side bends support
- Adaptive movable backrest, additional recline

Freedom of movement

METTA Y chair follows every movement of the user's body, giving a new level of comfort and activity, it allows you to feel happy, stay healthy, develop and maintain your potential productivity.

Dynamic support

The special backrest support design creates a flexible joint that supports the body during all turns and tilts, providing multidimensional movement.

The chair allows you to simultaneously recline the chair backrest, lean both to the side and back, while providing reliable support for the lumbar area and shoulders.

METTA Y

Adaptive movable backrest

The adaptive movable backrest unique design, allows you to additionally decline backwards in order to straighten up, straighten your shoulders, relieve tension from your muscles, normalize blood flow and eliminate muscle stagnation .

The unique backrest angle adjustment system allows you to adjust the initial vertical position at preferable angle.

METTA Y

The seat surface angle adjustment SAA mechanism

of the chair adjusts the angle of inclination, allowing you to raise or make lower the front part of the seat.

The lowered front part of the seat reduces pressure on the lumbar part, ensures correct posture and facilitates blood flow to the legs and feet. The user, in the inclined to the front position with a shifted support is forced to keep the spine in a neutral position. Being in this position daily reduces the risk of diseases of the spine and legs and is their prevention.

Ideal for working at a desk with a keyboard.

Adjustable lumbar support ALS

ALS allows you to adjust the proper position of the user's back in the chair, maintaining the natural curve of the spine, evenly distributing the load over the entire back.

Adjusting the height, depth and hardness of the ALS allows you to fill the space between the lumbar spine and the seat, providing a comfortable position and contributing to good posture.

The progressive design of this part harmoniously complements the high-tech design of the chair

All possible adjustments + unique

Only superb ergonomics tailored to every inch, along with multi adjustments customized for your individual anatomy can provide maximum tune up to a human body. The dynamic backrest converts the user's moves to create a natural balance and constant support.

Fabric upholstery

Superior LE genuine leather of excellent dressing

Genuine leather stands out with its tenderness and sophisticated image and points out the status of the leather item's owner. Thanks to its nature genuine leather has incomparable consumer properties, such as durability, extreme air permeability, moisture resistance and longevity. It's hypoallergenic, easy to clean and can handle over 150 000 abrading cycles.

Infinity Easy Clean Eco-Leather

Infinity Easy Clean Eco-Leather is a new-generation ultra-strong fabric as good as genuine leather in looks and even better in use. It's wear-resistant and can handle over 300 000 abrading cycles. The eco-leather is environmentally friendly, perfectly flexible, hypoallergenic, soft and delightful to touch. It has abrading resistance, repels dirt and is easy to clean. It is combined with a companion material Easy Clean Eco-Leather.

Infinity Easy Clean Perforated Eco-Leather

Infinity Easy Clean Perforated Eco-Leather is as good as Infinity Easy Clean Eco-Leather. It can handle over 250 000 cycles. Perforations allow a great air permeability. It is combined with a companion material Easy Clean Eco-Leather..

Extra Leather

Extra Leather is a state-of-art and convenient artificial material with enhanced wear resistance. It can handle over 200 000 abrading cycles or tensile stress but maintain the original shape. Vinyl leather on a fabric base with polyurethane coating is good to touch, flexible and hypoallergenic. It is combined with a companion material Extra Perforated Leather.

Extra Perforated Leather

Extra Perforated Leather has properties equal to Extra Leather. Its abrading resistance is over 150 000 cycles. Perforations allow second-to-none air permeability. It is combined with a companion material Extra Leather

YM93 Mesh Fabric

YM93 Mesh Fabric is an ultra-strong material. It has a dense woven polymer and pile threads for a better wear and abrading resistance over 300 000 cycles. The fabric bears a fine half-transparent texture and a relevant design. The material allows the body to breathe and maintains the natural temperature balance. It's hypoallergenic. The mesh fabric distributes loads, but maintains its shape. It's comfortable to use and easy to clean.

TS Mesh Fabric is a polymeric woven fabric with incredible strength

TS Mesh Fabric is a polymeric woven fabric with incredible strength and durability. It can handle over 250 000 abrading cycles. Aramid fiber integrated into the fabric increases the strength. Totally eco-friendly and infinitely durable material.

Goya Velour

GOYA Velour Collection has a magnetic pull to it thanks to a soft dense pile, a shear print with hardly catchable color transit. The palette is exquisite and sophisticated. Owners of GOYA Collection items will not be left untouched by the alluring aesthetic of the upholstery or unimpressed by simple maintenance. The fabric is hypoallergenic and can handle over 80 000 abrading cycles.

A significant feature of METTA chairs is a high degree of configurability: each component of the chair is made as a separate finished element (module), while all elements are universal and structurally compatible. This allows:

- **It is easy to configure a chair** for any client: get an individual, absolutely ergonomic chair;
- **improve and upgrade the chair at any time** - replace any chair component.
